

Ceramat WA 150

Inline version with application-specific process connection

Retractable fitting with ceramic sealing to the process for maximum measuring point availability. For measurement in highly viscous, abrasive, fibrous or clogging process media.

The no-wear process sealing and modular construction of the retractable fittings allow the drive to be disassembled for sensor adjustment, cleaning or replacement during the ongoing process. Particularly in conjunction with the automatic cleaning and calibration system, Ceramat achieves maximum measuring point availability with minimum maintenance effort. Also ideal for measurement with optical sensors.
